

Q-Connect

Can you easily integrate your self-service cash handling devices into your existing infrastructure?

Financial service software products for cash handling systems

APPLICATION

Q-Connect is the collective name for BANQIT's portfolio of software-products that are an important part of the company's innovative cash handling solutions.

Designed for the banking, retail and cash in transit environments, Q-Connect software provides the tools required for operating, monitoring and administering BANQIT's ATM products and Q-CashRouter cash recycling system.

HOW IT WORKS

Built entirely on Microsoft Windows® and CEN/XFS platforms, Q-Connect software supports industry standards for transaction protocols and works with any third-party hardware and software.

Q-Connect consists of four modular software products that are the building blocks of the cash handling system architecture. All products in the Q-Connect software portfolio can be tailored to meet specific business requirements.

Q-ConnectClassic supports self-service transactions using NDC and DDC standard protocols in ATM network environments. It can be used to create customer specific self service applications based on locally stored transaction sequences and screens and protocol conversion functions.

Q-ConnectAdmin supports administrative functions for cash replenishment and balancing, operational states, automatic error recovery, service and maintenance for a Q-CashRouter based cash recycling system.

Q-ConnectXFS supports multi-vendor software applications based on the CEN/XFS standard.

Q-ConnectEMV is an EMV Level 2 certified software kernel.

Q-ConnectClassic and Q-ConnectAdmin software products share the same Common Services

Common Services manages common functions, such as user management, cash management, auditing and Electroni Journal. It also provides support for different languages and currencies

BENEFITS

- Reliable operation
- Easy to configure and easy to integrate
- Lower total cost of ownership

Q-Connect

Product features

Q-ConnectClassic
- Supports industry standard transaction protocols (NDC+, DDC)
- Available on the CEN/XFS or BANQIT native platforms
- Interfaces common services for administrative functions
- EMV level 2 compliant
- 3DES enhanced security
- Enhanced graphics capabilities
- Easy to integrate customer applications through standard API
- Voice assistance for the visually impaired
- Additional WEB interface for marketing applications and personalised information
- Supports TCP/IP communication protocols
- Diebold 912 DES encryption scheme
- NDC and DDC encryption scheme
- Support of Wincor Nixdorf Extensions
- Create customized self service applications based on locally stored transaction sequences and screens
- Integration of proprietary self service application based on transaction protocol conversion
Q-ConnectAdmin
- Cash replenishment support including:
- Handling of SealPack storage unit
- Adding recyclable cash
- Handling of retained card box
- Handling of retracted cash box
- Bar Code Reading and check out of SealPacks
- Electronic Journal viewing
- Inventory viewing
- Statistics collection
- Managing operational state of the Q-CashRouter
- Error handling functions including automatic error recovery at note jam
- Service Management functions
Common Services Infrastructure handling
- Electronic Journal
- Cash Management
- Device Management
- Customer specific services
- Error reporting to host system based on Windows event logs
Q-ConnectXFS
- Supports multi vendor software applications based on Microsoft Windows
- Integrates with existing third-party ATM application software
Q-ConnectEMV
- Certified by EMVco according to EMV specification 4.3
- Facilitates the integration of multi-vendor devices and third-party application software, including BANQIT software
