

Q-Connect Classic

Can you easily integrate your self-service cash handling devices into your existing infrastructure?

Financial service software products for cash handling systems

Fast facts

- Flexible, modular multi-vendor software
-
- Supports industry standards for transaction protocols
-
- Reduced time to market
-
- Meets CEN/XFS standards for operation
-
- EMV compliant
-
- Easy to customize

APPLICATION

Q-ConnectClassic is a turn-key software solution for BANQIT's Self Service Products.

Based on the globally used transaction protocols it connects to most network switch products around the world.

Q-ConnectClassic provides smooth integration into existing ATM networks, whilst keeping the enhanced functionality, superior customer interface and transaction speed of BANQIT's Self Service Products

Apart from traditional ATM-networks the Q-ConnectClassic also connects to WEB server-based networks by HTML and embedded applets based on MS Explorer

How it works

Q-ConnectClassic supports self-service transactions using NDC and DDC standard protocols in ATM network environments.

QUICK NETWORK INTEGRATION

Q-ConnectClassic enables fast and easy installation of BANQIT Self Service products and makes it is easy to configure and integrate into an existing ATM network. The certification process is normally made within a few days. Q-ConnectClassic is easily adapted to any native language in any geographical area.

In addition to configuration for NCR and Diebold Direct Connect compatibility, extended configuration options enable an improved dialogue by taking advantage of the graphics capabilities.

A menu driven operator interface makes the "feed-and-care"

procedures fast and easy to handle so staff with little or no technical expertise can handle replenishments.

SIMULATION

A powerful ATM simulator makes it possible to pre-test the connection, downloads and screens without the need for ATM hardware.

WEB-ENABLED SOLUTION

Q-ConnectClassic provides connection to external WEB servers and downloads pages that are shown on the screen by Microsoft Internet Explorer. These pages are referenced from downloaded screen files and in relation to the different states of the system. The referenced pages may contain features like video clips or sound sequences. This greatly improves the possibility to provide marketing and personalised information.

BENEFITS

- Tailored for BANQIT Self Service Products
- Easy Network Integration
- NDC and DDC protocols
- Internet connection for efficient on-the-spot direct marketing
- Personalised services
- Wincor Nixdorf Extensions for NDC and DDC

Q-ConnectClassic

Product features

Q-ConnectClassic
- Supports industry standard transaction protocols (NDC+, DDC)
- Available on the CEN/XFS or BANQIT native platforms
- Interfaces common services for administrative functions
- EMV level 2 compliant
- 3DES enhanced security
- Enhanced graphics capabilities
- Easy to integrate customer applications through standard API
- Voice assistance for the visually impaired
- Additional WEB interface for marketing applications and personalised information
- Supports TCP/IP communication protocols
- NDC and DDC encryption schemes
- Wincor Nixdorf extensions to NDC and DDC for Cash In, EMV and Remote Key Loading
Q-ConnectXFS
- Supports multi vendor software applications based on Microsoft Windows
- Integrates with existing third-party ATM application software
Q-ConnectEMV
- Certified by EMVco according to EMV specification 4.3
- Facilitates the integration of multi-vendor devices and third-party application software, including BANQIT software
